

Free Fall

CRISIS IN THE SKIES Pilots with no control High above the Adirondack Mountains, a commuter flight to New York City turns into a rolling, twisting nightmare, plunging from the sky before the crew regains control. Then, in London, a jetliner crashes into the runway, killing fifteen people. Investigators with no answers Reporter Kate Page believes something beyond mechanical or human error is behind the incidents that have air investigators baffled. But the mystery deepens as teams scramble to pinpoint a link between the tragedies, and Kate receives an untraceable message from someone boasting responsibility and threatening another event. A looming disaster As Kate, the FBI and the NTSB race to find answers, the shadow figures behind the operation launch their most devastating plan yet, and time ticks down on one of the greatest tragedies the world has ever known.

free fall?????? ??????????1(?????????????)????2(?????????????????????????)???? - ?1079????The free-fall time is the characteristic time that would take a body to collapse under its own gravitational attraction, if no other forces existed to oppose theAn object that is moving only because of the action of gravity is said to be free falling and its motion is described by Newtons second law of motion. With algebraA free falling object is an object that is falling under the sole influence of gravity. Any object that is being acted upon only by the force of gravity is said to be in a state of free fall. In Newtonian physics, free fall is defined as the motion of an object where gravity is the only force acting upon it. By this definition then, a skydiver is never in true free fall, even before they deploy their parachute.freefall (uncountable) (common usage) The state of falling with no interference from outside forces other than the air resistance (no open parachute, etc.)Freefall definition, the hypothetical fall of a body such that the only force acting upon it is that of gravity.
