

Here's a clear, believable book for Canadians concerned about our situation — and it offers a solution. It's a brilliant mix. To “Canada's best mind on the environment,” Mark Jaccard, who won the 2006 Donner Prize for an academic book in this area, you add Nic Rivers, a researcher who works with him at Simon Fraser University. Then you add Jeffrey Simpson, the highly respected Globe and Mail columnist, to punch the message home in a clear, hard-hitting way. The result is a unique book. Most other books on energy and climate change are: (a) terrifying or (b) academic or (c) quirky, advocating a single, neat solution like solar or wind power. This book is different. It starts with an alarming description of the climate threat to our country. Then it shifts to an alarming description of how Canadians have been betrayed by their politicians (“We're working on it!”), their industrialists (“Things aren't that bad, really, and voluntary guidelines will be good enough.”), and even their environmentalists (“Energy efficiency can be profitable, and people can change their lifestyles!”) All of this, of course, reinforces the myths that forceful policies are not needed. Hot Air then lays out in convincing and easily understandable terms the few simple policies that Canada must adopt right away in order to significantly reduce greenhouse gas emissions over the next few decades. It even shows how these policies can be designed to have minimal negative effects. With evidence from other countries that are successfully addressing climate change, Hot Air shows why these are the only policies that will work — and why this is a matter of life and death for all of us. From the Hardcover edition.

Museum Of Natural History: Insects Discover The World Of Insects In This Ultimate Museum Experience (Quarto Childrens Book), The Devils Kingdom (Ben Hope, Book 14), Carbon Copies, A Pinch of Snuff: A Dalziel and Pascoe Novel, The Thief Who Couldnt Sleep (Evan Tanner), The Dust of Everyday Life: An Epic Poem of the Pacific Northwest, A?ber das Gluck: Gedichte und Prosa, Journal of genetics, DSM-5 Pocket Guide for Child and Adolescent Mental Health, Ecology for Sustainable Management,
